FIRST SEMESTER

BASLP101 INTRODUCTION TO HUMAN COMMUNICATION

(100+50marks)

(Total=75hrs)

Objectives:

After studying this paper at the end of the year, the students should be able to understand the following –

1. Human communication, processes involved in communication
2. Interrelation between Hearing, Speech and Language
3. The neurological, psychological, social and acoustic bases of communication
4. Concept Of Linguistics. Branches Of Linguistics.

Unit 1

(15hrs)

1. History and development of the profession of Speech-Language Pathology (SLP) specifically in India
2. Major work activities of the SLP
3. Various settings of service delivery
4. Other professions concerned with communication disorders
5. Human communication:
 - Definition and component
 - Interdependency & interrelation between communication, hearing, speech, and language.
 - Function of communication, speech and language
 - Modes of communication (Verbal & Non-verbal)
 - Characteristics of good speech
6. Interactive bases of human communication
 - genetic bases
 - psychological & cognitive bases
 - social bases
7. Speech as an overlaid function
8. Pre-requisites and factors affecting language and speech development

Unit2**(15hrs)**

1.Nervoussystem:

Divisions and functions of the nervous system, nerve cell, receptors and synapse, types of nerve fibers. Peripheral nervous system. Brief description of spinal cord and CSF. Structure of the brain and divisions: general and lobes of cerebrum. Reticular formation, Basal ganglia and cerebellum. Reflex action and common reflexes. Cranial nerves, distribution and supply with the special reference to II, V, VII, IX, X, XII., Nerve tracts (motor and sensory), Brodmann's area, anatomy of the nervous system related to speech and language.

Unit3**(15hrs)**

Mechanism of speech and language production-I

- Anatomy and physiology of respiratory system: Detailed study of trachea, larynx, oropharynx and nasopharynx.
- Respiration for life and speech
- Physiology: External and internal respiration. Mechanism of respiration-internal and external influence, nervous control, Lung volumes (vital capacity-tidal volume, residual air, artificial respiration. (in brief)
- Exchange of gases in the lungs and tissues. Hypoxia, asphyxia and cyanosis. Regulation of respiration. Respiratory efficiency test.

Unit4**(15hrs)**

1. Basic Acoustics of speech:

- Waves – What is a wave? Progressive waves – sound waves – wave propagation Doppler effect – reflection, diffraction, interference, absorption. Resonance of a mass spring vibrator – standing waves – partials, harmonics and overtones – Acoustic impedance – Helmholtz resonator – sympathetic vibrations.

2. Mechanism of speech and language production-II

- Anatomy and physiology of laryngeal system (including Doppler Effect)
 - Development of voice
- Bases of pitch and loudness change mechanism

Unit5**(15hrs)****Mechanismofspeechandlanguageproduction-III**

- AnatomyandPhysiologyofArticulatorysystem
- DevelopmentofArticulation
- AnatomyandPhysiologyofResonatorysystem
- Phonetics: Definition and Branches. Brief sketch of articulatory, acoustic and auditory phonetics. ClassificationOfSpeechSoundsvizSegmental(consonants and vowels, semi vowels, diphthongs) and Suprasegmentals (stress, pitch, tone and intonation-) IPA symbols and transcription of sentences of typical speech)

LISTOFBOOKS**CompulsoryReading:**

1. SpeechCorrection:AnIntroductiontoSpeechPathologyandAudiology(8thEd.).VanRiper,CandEmerick, L.(1990). New Jersey:Prentice HallInc.
2. Singh,I.(1996).TextbookofAnatomywithColorAtlas, Vol.III Jaypee Brothers.
3. Zemlin,W.R.(1981).SpeechandHearingScience:AnatomyandPhysiology,(2ndEd.)EnglewoodCliffs,New Jersey:PrenticeHall.

Additional/OptionalReading:

1. Minifie,F.D.,Hixon,T.J.,andWilliams,F.(1973).Normalaspects of Speech,HearingandLanguage. New Jersey:Prentice Hall Inc.
2. Skinner,P.H.andShelton,R.L.(1978).Speech,LanguageandHearing-Normal Processesand Disorders. (2ndEd.). New York:John Wileyand Sons.
3. HumanCommunicationDisorders:AnIntroduction(4thEd.).Shames,G.H.Wiig, E.H.& Secord,W.A.(1994) New York:Merill Publishing Co.
4. SpeechandHearingScience,AnatomyandPhysiology(3rded.).Zemlin,W.R.(1988) New Jersey: EnglewoodCliffs
5. HumanCommunication& Its Disorders(2ndEd.).Boone,D.R.&Plante,E.(1993).New Jersey: PrenticeHallInc.
6. Palmer,J.M.(1984).AnatomyforSpeechandHearing,(3rdEd.).New York:HarperandRow.
7. Perkins,W.H.andKent,R.D.(1986).TextbookofFunctionalAnatomyofSpeech,Langu ageandHearing. London:Taylor and Francis.
8. Gray'sAnatomy.(37thEd.). WilliamsWarwickandDysonBanniser.(1989).Churchill

BASLP102 SPEECH-LANGUAGE DEVELOPMENT AND DISORDERS

(100+50marks)

(Total=75hrs)

Objectives

After studying this paper at the end of the year, the students should be able to understand the following:

- Development of speech & language
- Identify different speech & language disorders
- Basics of assessment and intervention for Child language disorders.

Unit1

(15hrs)

Development of speech and Language:

Development of language

- Semantics: A brief introduction to different types of meaning homonyms, synonyms and antonyms.
- Phonology:
- Morphology: Morpheme – bound and free, process of word formation, content and function words.
- Syntax: grammatical and syntactic categories, sentence types, Syntactic analysis.
- Pragmatics: Introduction to verbal and non-verbal communication and other indicators, intent of communication.

Unit2

(15hrs)

Theories and models of language Acquisition –

Behavioral, Nativistic, Cognitive, Linguistic, Pragmatic, Biological and Information processing model.

Developmental issues in communicative development – genetic, neurological, medical, behavioural, social and psychological.

Bilingualism/multilingualism in children; Bilingual Language learning contexts at home and school situations, compound/coordinate context and others.

Unit3 (15hrs)

Definition,Etiology,Characteristics,ClassificationandImpactof

- HearingImpairment
- MentalRetardation
- CerebralPalsy
- Seizuredisorders

Introductiontoassessmentprocedures,differentialdiagnosisandmanagement.

Unit4 (15hrs)

Definition,Etiology,Characteristicsandclassificationof

- AutismSpectrumDisorders/PervasiveDevelopmentalDisorders
- AttentionDeficitDisorder/AttentionDeficitHyperactiveDisorder
- Multipledisabilities

Introductiontoassessmentprocedures,differentialdiagnosisandmanagement.

Unit5 (15hrs)

Definition,Etiology,Characteristics,ClassificationandImpactof

- SpecificLanguageImpairment
- LearningDisability
- Acquiredaphasiasinchildhood
- TraumaticBrainInjury
- Multipledisabilities

Introductiontoassessmentprocedures,differentialdiagnosisandmanagement

inbrief (5hrs)

LISTOFBOOKS

CompulsoryReading:

1. Reed,V.(1994).AnIntroductiontochildrenwithlanguagedisorders.(2ndEd.)New York: Macmillan.
2. NelsonN.W(1998).Childhoodlanguagedisordersincontext–infancythroughadolescence,AllynandBacon,Boston.
3. Hegde,M.N.(1996).ACoursebookonLanguageDisordersinChildren.SanDiego:Singul arPublishers.
4. LadefogedP.(1992).AcourseinPhonetics.(3rdEd.).NewYork:HarcourtBraceJovano vich.
5. Lees,J.A.andUrwin,S.(1991):ChildrenwithLanguageDisorders.Whurr Publishers

Additional/OptionalReading:

1. Woolfolk,E.&LynchJ.(1982).Anintegrativeapproachtolanguagedisordersinchil dre n. New York:Grune andStratton.
2. ThirumalaiM.S.ShyamalaChengappa(1988)SimultaneousAcquisitionoftwolangu ages CIIL,Mysore
3. Fromkin,L.F.andRodman,R.(1993).AnIntroductiontoLanguage(5thEd.).NewY ork: Harcourt BraceJovanovich
4. SubbaRao(1992).DevelopingcommunicationskillsinMR,NIMH,Secunderabad.
5. ShyamalaK.Chengappa(1992).SpeechandLanguageofthecerebralpalsied,CIIL,Mysor e.
6. ShyamalaK.Chengappa(1986).Introductiontospeechdisordersinchildrenanintrod uctionIED cell, PortBlair, Anadamans&Nichobars.
7. O'Connor.(1993).Phonetics.Hammondsworth:Penguinbooks
8. Yule,G(1996).TheStudyofLanguage:AnIntroduction.(2ndEd.).Cambrige:Cambr idgeUniversityPress.
9. Lyons,J.(Ed.).(1970).NewHorizonsinLinguistics.Hammondsworth:PenguinBook s.
10. Akmajian.A.etal.(1990).Linguistics:AnIntroductiontoLanguageandCom munication

BASLP103 TECHNOLOGY AND MANAGEMENT FOR PERSONS WITH HEARING IMPAIRMENT – I

(100+50marks)

(Total=75 hrs)

Objectives:

After studying this paper at the end of the year, the students should be able to understand the following –

- Basicsof electricity, electronics and digital processing
- Transducers
- Basic components and types of hearing aids
- Earmoulds

Unit1

(15hrs)

(Operational characteristics, types and specifications.-

Nodesign aspects. Concepts and block diagrams only.)

1. Basics of electricity & electronics - Direct and alternating current, DC Power supplies, voltage stabilizers, Passive circuit elements, transistors. Linear and digital Integrated circuits, microprocessors. Micro computers and Computers. Filters, Linear and non-linear Amplifiers and Oscillators, Amplifier power and distortion.
2. Basics of digital signal processing – Analog signal, digital signal, A to D and D to A conversion, Basic concept of Digital Signal Processing and its implementation, How does a DSP based system works? Application-DSP based hearing aids.

Unit2

(15hrs)

1. Microphones as transducers. Velocity microphones. unidirectional microphones. Microphone impedance and sensitivity. Loudspeakers as transducers. Structure of a dynamic loudspeaker. Air suspension. Baffles and enclosures. Horn speakers. Multi-speaker systems. Loudspeaker Efficiency, Loudspeaker power and distortion. Recording and Reproduction of sound. Recording characteristics. Dynamic Range, Stereophonic recording. Magnetic tape recording and playback. Tape speed and frequency response, Bias and equalization, Tape noise, Digital Tape recording, CDROM recording.
2. Measuring Instruments-Multi-meter. Cathode-ray oscilloscope. Sine wave generator.

Function Generator, Frequency counter, Measuring microphones, Sound Level Meter, Integrated Sound Level Meter, Artificial ear, Artificial Mastoid, Couplers, Hearing aid test box, Measurement of different types of sound.

Unit3 **(15hrs)**

- a) Historical development of hearing aids Non-electrical hearing aids, Electric hearing aids
- b) Introduction to hearing aid technology: Parts of hearing aids & their functions, Basic elements of hearing aids: Microphone, Amplifier, Receiver, Cords, Batteries, earmoulds.

Unit4 **(15hrs)**

- Classification of hearing aids. Type of hearing aids, their advantages and limitations:
 - Body level, ear level (BTE, ITE, ITC, CIC).
 - Monaural Vs Binaural Vs Pseudobinaural.
 - A and B Clearing aids.
- Classroom amplification devices; Group amplification systems – hardwired, induction loop, FM, infrared rays.

Unit5 **(15 hrs)**

- Earmoulds: Importance, types (hard, soft), procedure of making each type of earmould, styles of ear moulds, criteria for selection of one style over the other, earmould modifications,
- Importance of counseling for users & parents – importance of harness, BTE loops. Tips to facilitate acceptance of hearing aids, battery life, battery charger.

Counseling

for geriatric population, Troubleshooting of hearing aids. Solar Charger and its specifications.

LIST OF BOOKS

Compulsory Reading:

1. Skinner HW (1988), Hearing aid evaluation, Prentice Hall, Englewood Cliffs, NJ.
2. Pollack M (1980) Amplification for the hearing impaired. Grune and Stratton, NY.
3. Basic Electronics: A text-book; Paul B Zbar, Albert P. Malvino. (5th Edn), McGraw Hill Inc, (1983)
4. Hearing aid assessment and use in Audiologic Habilitation. (3rd ed.). William Hodgson (Ed.)
5. Audiologist's desk reference.
6. Hearing Aids: Standards, Options and Limitations. Michael Valente.
7. Audiologic Treatment. Michael Valente, Hosford-Dunn, Roeser.
8. Hearing Instrument Technology for the hearing healthcare professional. A. Vonlanthen.

Additional Reading:

1. Loavenbruck All and Madell IR (1981), Hearing aid dispensing for audiologists: A guide for clinical service. New York: Grune and Stratton.
2. Bessel et al (1981). Amplification in Education, Alexander Graham Bell Association for the Deaf, Washington.
3. Hull, R.H. (1982). Rehabilitation Audiology, New York: Grune and Stratton.
4. Donnelly K (1974), Interpreting hearing aid technology, CC Thomas, Springfield.
5. Markides A (1977) Binaural hearing aids, Academic Press Inc., London.
6. Hodgson H R and Skinner (PH) (1977, 1981), Hearing aid Assessment and use in audiological habilitation, Williams and Wilkins, Baltimore.
7. Cooper (1991), Practical aspects of Audiology: Cochlear implants: A practice guide. Whurr Publisher, London.
8. Mueller HG, Hawkins DB., Northern JL. (1992), Probe microphone measurements: Hearing aid selection and assessment, Singular publishing group Inc., California.
9. ANSI & IEC Specifications

(50+50marks)

To include IPA for normal samples

To include tests: LPT, PAT, Reynell's scale, LST - cognitive prerequisites for language learning

1. Taking case history of a minimum of 10 individuals (5 normal & 5 clients with complaints of speech-language problems)
2. Label and identify structures of the speech mechanisms with the help of charts, models, specimen and computer software
3. Conduct Oral Peripheral Mechanism examination on at least 5 normal and 5 children/adults with speech language complaints
4. Analyze the following in normal subjects:
 - Pitch – normal/high/low
 - Loudness – normal/loud/soft
 - Quality – normal/hoarse/harsh/breathy/hyper-nasal/hypo-nasal
 - Rate of speech – normal/fast/slow
 - Articulation – normal/abnormal
 - Fluency – normal/abnormal
 - Intelligibility – using the AYJ NIH Intelligibility rating scale
5. Use varying range of pitch and loudness
 - Measure F0, Vital capacity, phonation duration, rate of speech, Alternate Motion Rates and Sequential Motion Rates, s/z ratio in 5 normal individuals
6. Measure in 2 normal samples (with the help of video or live)
 - Mean Length of Utterance (MLU)
 - Syllable structure
 - Syntactic structures
 - Communication intent

7. Use proforma for the following disorders:

- Articulation
- Voice
- Fluency
- Cleft lip and palate
- Child language assessment

8. Use scale/test for:

- Receptive language skills
- Expressive language skills

Receptive Expressive Emergent Language Scale (REELS)

3-Dimensional Language Acquisition Test (3DLAT) Scales of Early Communication

Skills for Hearing impaired children (SECS) and Indian tests

Maintenance of a clinical work record to be submitted at the end of the term

1. Observation of therapy of 10 clients with speech language disorders.
2. Observation of a minimum of 5 diagnostic clients and 5 therapy clients
3. Developing therapy material specific to 10 clients they have observed

Writing of observation reports of the above Maintenance of a clinical diary

SECOND SEMESTER

BASLP201:INTRODUCTIONTOHEARING&HEARINGSCIENCES

(100+50marks)

(Total=75 hrs)

Objectives:

After studying this paper at the end of the year, the students should be able to understand the following –

- Basic aspects of auditory system
- Physical and psychophysical basis of sound
- Causes of hearing loss
- Procedures involved in clinical testing – tuning fork tests, AC and BC testing in pure tone audiometry, clinical masking

Unit1

(03hrs)

- Origin of Audiology
- Its growth & development (since World War II)
- Its growth in India
- Scope of Audiology
- Branches of Audiology

Unit2

(25hrs)

- Audiovestibular system: Anatomy of the external, middle and internal ears. Ascending and descending auditory and vestibular pathways.
- Physiology of the external, middle & inner ear, central hearing mechanisms, cochlear microphonics, action potentials, theories of hearing (AC & BC).
- Vestibular system: Functions of utricle, saccule and vestibular apparatus. Posture and equilibrium.
- Role of anatomy and physiology in hearing (threshold concept, binaural hearing, head shadow, pinna shadow effect, MAF, MAP – Curve for threshold of hearing) & in understanding causes of hearing impairment.

Unit3**(10hrs)**

- Sound Pressure, Power and Loudness. Physical and psychophysical scales, Equalloudness contours, Frequency weighting curves, combined sources, Pitch and Timbre. Physical and psychophysical scales. Fourier analysis of complex tones
- dB concept: power and pressure formulae: zero dB reference for pressure and power calculation of actual SPL, reference and dB values with any two given values, calculation of overall dB when two signals are superimposed.
- Phones and Sones: relation between phones and sones; use of phone and sonograph; computation of relative loudness of two given sounds using these graphs. Frequency and intensity, their psychological correlates: dL for frequency and intensity.

Unit4**12hrs**

- Causes of hearing loss
- Genetic (congenital, late onset, progressive, syndromic/non-syndromic)
- Non-Genetic (Congenital/acquired)
- Importance of case history in identifying the cause of hearing loss

Unit5**(25hrs)**

- Tuning fork tests (Rinne, Weber, Bing, Schwabach), interpretation, merits & demerits.
- Pure Tone audiometry: Need and scope, Instrumentation, Standards, Permissible ambient noise levels for audiometric testing, Different types of transducers, Basic concepts of AC & BC testing procedures, Theories of bone conduction, Precautions to be taken while testing, Sound field & closed field testing, Factors affecting AC & BC testing, Screening Vs Diagnostic pure tone testing.
- Interpretation of audiograms, Classification of audiograms, Calibration: Biological and instrumental for AC & BC transducers.
- Masking: Definition, types of masking, types of noises, critical band concept, Terminology related to masking: Test ear, non-test ear, masker, maskee, crossover, cross hearing and shadow curve. Interaural attenuation; Factors affecting IA; Criteria for masking during AC & BC. Factors determining amount of masking noise, AB gap in masked ear, masking dilemma in bilateral symmetrical conductive hearing loss.
- Fusion Inferred Test (FIT)
- Orientation to speech audiometry

LISTOFBOOKS

CompulsoryReading:

1. Hodgson,H.R.(1980)Basic Audiologic Evaluation,London Williamsand Wilkins.
2. Martin,F.N.(1991),Introductionto Audiology,IV Edition,New Jersey:Prentice Hall.
3. Newby,H.A.(1985),Audiology,New York:Appleton-Century-Crofts.
4. Testing,interpretationandrecording-ISHA Battery(1990).ISHA publication.
5. The Scienceof sound–Thomas D.Rossing,Addion–Wasloy Publishing Company
6. Architectural Acoustics.Egan,M.D.McGrawHill Inc,(1988)
7. Bess and Humes(1990) Audiology-Fundamental. Williamsand Wilkins, London.
8. Davis and Silverman,(Latest Edition). Hearing and deafness.Holt,Rineheart& Winston, London.
9. Rose,D.M.(Ed.)1978),Audiological Assessment,New Jersey:Prentice Hill.
10. Speaks Charles.Introduction to Sound.
11. Yost, William.(2000).Fundamentals of Hearing.4th edition.
12. Durrant,J.and Lovrinic,J.(1995).Bases of Hearing Science.3rd edition.

AdditionalReading:

1. Beagley,H.A.(Ed.)(1981).Audiology and Audiological Medicine.Vol.1,Oxford University Press.
2. Relevant BIS documents & ANSI Document
3. Stach–Clinical Audiology
4. Gelfand–Diagnostic Audiology

BASLP202BasicMedicalSciencesrelatedtoSpeech&Hearing

(100+50marks)

(Total=75

hrs)Objectives:

ves:

After studying this paper at the end of the year, the students should be able to understand the following –

- Basic anatomy and physiology related to speech and hearing
- Basic neurological, genetic issues related to speech and hearing
- General diseases/conditions related to speech and hearing disorders

Unit1

(15

hrs)

- (a) General introduction, definitions, Coronal/sagittal/plane) Planes. Definition of anatomy, morphology, physiology, histology, embryology.
- (b) Definition of Cell and organelles, tissue, organ system, specialized tissues like nervous tissue, vascular tissue, muscle and bone tissue.
- (c) Nervous system: Definition of neuron, synapse, reflex action, bio electrical phenomena, action potential, depolarisation, division and functions of the nervous system, brain – general lobes, reticular formations, basal ganglia, cerebellum, circle of Willis, cranial nerves, spinal cord, CSF – formation & flow.
- (d) Circulatory system: Definition of capillaries, arteries, veins, cardiac cycle, blood brain barrier, aneurysm, vascular shock – its reference to aphasia / speech disorders.
- (e) Respiratory system: General outline, detailed study of trachea, larynx and nasopharynx, mechanism of respiration – internal and external influence, nervous control – vital capacity – tidal volume, residual air, artificial respiration (in brief).

Unit2

(15hrs)

- (a) Definition of inflammation, infection, tumor – benign & malignant, tissue healing.
- (b) Genetics : introduction – structure of DNA and RNA, karyotyping, family tree (pedigree chart), symbolic representation, inheritance, autosomal dominant, autosomal recessive, sex chromosomal disorders, structural aberrations, mutation (in brief).

(c) Endocrine system: Definition of hormone, functions of thyroid hormone, growth hormone, androgen, testosterone and its influence in voice disorders.

Unit3 (15 hrs)

(a) Anatomy & Physiology of external, middle & inner ear, auditory pathways, vestibular pathway. Diseases of the external, middle and inner ear leading to hearing loss:

Congenital malformations, traumatic lesions, infections, management of middle ear and Eustachian tube disorders.

(b) Other causes of hearing loss – Facial paralysis, Tumors of the cerebello-pontine angle, Acoustic neuroma. Infection and management of inner ear diseases. Cochleo-vestibular diseases and its management.

Unit4 (15hrs)

(a) Anatomy & Physiology of pharynx & oro-peripheral structures. Causes of speech disorder, Disorders of the mouth, Tumors of the jaw and oral cavity, nasopharynx and pharynx, pharyngitis, Diseases of tonsils and adenoids.

(b) Oesophageal conditions: Congenital abnormality – Atresia, Tracheo-oesophageal fistula, Stenosis, Short oesophagus. Neoplasm – Benign, Malignant, Lesions of the oral articulatory structures like cleft lip, cleft palate, submucosal cleft, Velopharyngeal incompetence.

Unit5 (15hrs)

(a) Anatomy & Physiology of larynx – physiology of phonation/physiology of respiration.

(b) Congenital diseases of the larynx – difference between an infant and an adult larynx. Stridor – causes of infantile stridor. Disorders of structure – Laryngomalacia, Bifid epiglottis, Laryngeal web, Atresia, fistula, Laryngeal cleft, Tumors and Cysts, Laryngitis, Laryngeal trauma and Stenosis. Neuromuscular dysfunction of the larynx – Vocal cord palsy, Spastic dysphonia, Hypothyroidism, gastro oesophageal reflux

disorders, Laryngectomy, artificial larynx, oesophageal speech, tracheo-oesophageal puncture.

LIST OF BOOKS

Compulsory Reading:

1. Singh,I.(1996).TextbookofAnatomywithColorAtlas,Vol.IIIJaypeeBrothers.
2. Zemlin,W.R.(1981).SpeechandHearingScience:AnatomyandPhysiology,(2ndEd.).EnglewoodCliffs,NewJersey: PrenticeHall.
3. Alper,C.M.,Myers,E.N.,Eibling,D.E.(2001).DecisionmakinginEar,Nose&Throatdisorders. W.B.SaundersCompany,Philadelphia.
4. Dhingra,P.L.(1992).DiseasesofEar,Nose&Throat.ChurchillLivingstone,NewDelhi.
5. GraymR.F.,Hawthorne,M.(1992).SynopsisofOtolaryngology.ButterworthHeinemannLtd,Oxford.5th Edition.
Ramalingam,K.K.,Sreeramamoorthy,B.(1990).A short practice of Otolaryngology.
A.I.T.B.S.PublisherDistributors.
6. Scott-Brown,W.G.,Ballantyne,J.,Groves,J.Diseasesofthenose&throat.Butterworth&Co., Ltd.2ndedition,Chichester.
InderbeerSingh(1996)–Textbookofembryology.

Additional/Optional Reading:

1. Palmer,J.M.(1984).AnatomyforSpeechandHearing,(3rdEd.).NewYork:HarperRow.
2. Perkins,W.H.andKent,R.D.(1986).TextbookofFunctionalAnatomyofSpeech,LanguageandHearing.London:Taylor andFrancis.
3. Gray's Anatomy.(37thEd.).WilliamsWarwickandDysonBanniser.(1989).ChurchillLivingstone.

**BASLP203 PSYCHOLOGY RELATED TO SPEECH AND
HEARING(100+50marks) (75hrs.)**

Objectives After studying this paper at the end of the year, the students should be able to understand the following:-

- Developmental Psychology
- Psychology of learning
- Neuro-Cognitive issues in the field of speech and hearing

Unit1 (15hrs.)

- Introduction to psychology –

Definition, History and perspectives, Branches and scope, application of psychology in the field of speech and hearing.

- Introduction to Clinical Psychology –

Definition, perspectives and models of mental disorders.

- Disorders of infancy, childhood and adolescence association with hearing and speech and language disorders – Mental Retardation, Learning Disorders, Communication Disorders, Attention Deficit Hyperactivity Disorder, Conduct Disorders.

Unit2 (15hrs)

- Psychology of learning –

Introduction, Definition of learning, Theories of learning, Classical conditioning, Operant conditioning and Social learning.

- Application of learning theories in the field of speech and hearing (therapeutic, educational and rehabilitative applications).

Unit3 (15hrs)

- Cognitive Psychology –

Introduction, Definition and theoretical perspectives (David Rumelhart and David McClelland, Noam Chomsky, George Miller, Allan Newell).

Applications of cognitive psychology in the field of speech and hearing.

- Intelligence – definition, theories and factors affecting intelligence
- Neuropsychology –

Introduction, definition, principles of neuropsychological assessment, diagnosis and rehabilitation.

- Applications of neuropsychology in the field of speech and hearing.

SunRise University

Unit4**(15hrs)**

- Psychodiagnostics—
Casehistorytaking,Mentalstatusexamination,behaviouralanalysis,
psychologicaltesting.
- Playasatherapeutictool
- Counselling—Meaninganddefinition,typesofcounseling,Counselinginrehabilitationpractice.

Unit5**(15hrs)**

- DevelopmentalPsychology—
Introduction,definition,principles,motordevelopment,emotionaland
socialdevelopment
- Cognitivedevelopment—definition,Piget's Theory
- PersonalityDevelopment—Introduction,theories,hallmarksofthewelladjustedpersonality,
hazardsinpersonalitydevelopment.

LISTOFBOOKS**CompulsoryReading:**

- 1) Hurlock,E.B.(1981).ChilddevelopmentVIEd.McGrawHillInternationalBookCo.
- 2) MorganC.T.,King,R.A.,RobinsonN.M.IntroductiontoPsychology.TataMcGrawHillPubli
shing Co.
- 3) ColemanJ.C.AbnormalPsychologyandModernLife,TaraporevalaSons&Co.
- 4) CognitiveNeuro-ScienceofDevelopmentbyMichalledeHank&MarkH.Johnson
- 5) ApplicationofCounsellinginSpeech-LanguagePathologyandAudiology—ThomasA.Crowe,

- 3) Anastasi,A.(199).Psychologicaltesting,London:Freeman

BASLP204 CLINICAL PRACTICUM IN AUDIOLOGY

1. Public information materials (a videos, pamphlets, booklet etc.)
2. Taking case histories of 10 adults and 10 children with normal hearing and with hearing impairment under supervision.
3. Analyse 10-15 case histories of adults and children with hearing impairment.
4. Under going pure-tone audiometry. Becoming familiar with different types to sound stimuli used for assessment of hearing and sound generator software's.
5. Identifying the different types of audiometer (at least 1 portable and 1 diagnostic) and their accessories referring to their respective manuals. Get familiar with the various parts of audiometers and their functions. Carry out listening checks of audiometers. Trouble shoot audiometers. List the different earphone/ear cushion combination. BC vibrator. Study the same and report the status of the same.
6. Preparing 0dB HL equivalent chart with different earphone/ear cushion combination.

7. Obtain audiograms of 10 normal subjects.
8. Observations/Participation during audiological evaluation on a variety of cases under supervision. Plot the audiograms; calculate of Inter-aural attenuation, Occlusion effect.
9. Obtaining audiograms under supervision on 20 adults clients (AC&BC) 10. Obtaining audiograms with masking (5 cases)
11. Classify audiograms as per: nature of hearing loss
 - Nature of hearing loss
 - Degree of hearing loss C
on to the audiograms
12. Observe calibration of audiometers (Demonstration) – AC/BC/Sound field, instruments used, identifying the instruments, combination of equipments of different types of calibration, preparing correction charts.

THIRD SEMESTER

BASLP301 SPEECH LANGUAGE DIAGNOSTICS AND THERAPEUTICS(100+50marks)

(Total=75hrs)

Objectives

After studying this paper at the end of the year, the students should be able to understand the following –

1. Importance of client history, diagnostics and therapeutic approaches
2. Taking client history and therapy in general
3. Will get theoretical backup for clinical documentation

A. Speech language diagnostics

Unit1

(7hrs)

1. Basic terminologies and concepts
 - Introduction to diagnostics
 - Terminologies in the diagnostic process
 - General principles of diagnosis
 - Diagnostic setup and tools

Unit2

(18hrs)

1. Diagnostic approaches and methods
 - Client history – definition, description, utility & need. Essential factors to be included in the client history form – comparison of adults vs. children's history – usefulness of the client history
 - Approaches to diagnosis – importance of diagnosis in client history, essential factors to be included according to the conditions/disorders. Methods of taking case history.
 - Interview – principles and techniques
 - Self-reports, questionnaire, observations.
 - Diagnostic models – SLPM, Wepman, Bloom and Lahey
 - Types of diagnoses – Clinical diagnosis, direct diagnosis, differential diagnosis,

diagnosis by observation, diagnosis by exclusion, diagnosis by treatment, instrumental diagnosis, provocative diagnosis, provisional diagnosis; advantage/disadvantages

- Team approach to diagnosis
- Characteristics of a good clinician as diagnostician

B. Speechtherapeutics

Unit3

(15hrs)

1. Basic concept of therapeutics
 - Terminologies in speechtherapeutics
 - General principles of speech and language therapy
 - Speechtherapy set-up
 - Types of speech and language therapy
 - Individual and group therapy
 - Integrated and inclusive education

Unit4

(19hrs)

1. Procedures for speech-language therapy
 - Approaches to speech and language therapy – formal, informal and eclectic approaches
 - Planning for speech and language therapy – goals, steps, procedures, activities
2. Techniques for:
 - Speech and language therapy for various disorders of speech and language
 - Importance of reinforcement principles and strategies in speech and language therapy, types and schedules of rewards and punishment

Unit5

(16hrs)

1. Clinical documentation and professional codes
 - Documentation of diagnostic, clinical and referral reports
 - Introduction to parent counseling, facilitation of parent participation and transfer of skills, follow-up
 - Evaluation of therapy outcome
 - Ethics in diagnosis and speechlanguage therapy
 - Self-assessment and characteristics of a clinician

LISTOFBOOKS

CompulsoryReading:

1. Meyer,S.M.(1998).Survivalguideforthebeginningspeech-languageclinician.Maryland:Aspen Publishers.
2. Owens,R.E.(1999).Languagedisorders:Functionalapproachtoassessmentandintervention.Boston:Allyn & BaconInc.
3. Tomblin,E.et.al.(1994).DiagnosisinSpeechlanguagepathology.SanDiego:SingularPublishingInc.
4. Shipley,K.G.,7Mcafer,J.G.(1998).Assessmentinspeechlanguagepathology:Aresourcemanual.SanDiego:Singular Pub Inc.
5. Klein,H.B.,&Nelson,M.(1994).Interventionplanningforchildrenwithcommunicationdisorders: A guide for clinical practicum and professional practice. NewJersey.PrenticeHall.

Additional/OptionalReading:

1. Frattali,C.M.(1998).MeasuringoutcomesinSpeechLanguagePathology.NewYork:Thieme.
2. Shames,G.H.(2000).Counsellingthecomunicativelydisabledandtheirfamilies.Boston:Allyn & Bacon.
3. Hegde,M.N.(1985).Treatmentproceduresincommunicativedisorders.Texas.ProEd.
4. Darley,F.L.,&Spriesterbach(1978).DiagnosticmethodsinSpeechPathology.SanDiego :Singular PubInc.
5. Leith,W.R.(1993).Clinicalmethodsincommunicativedisorders.Texas.Pro.Ed.

BASLP302ARTICULATIONANDPHONOLOGICALDISORDERS

(100+50marks)

(Total= 75hrs)

Afterstudyingthispaperattheendoftheyear,thestudentsshouldbeabletounderstandthefollowing –

- Developmentofphonology
- Factorsrelatedtoarticulationandphonologicaldisorders
- Assessmentandtherapyprocedures

Unit1

(20hrs)

1. Reviewofphonologicaldevelopmentandarticulatorymechanism
2. FundamentalsofArticulatoryphonetics
3. Definitionandtypesofcoarticulation
4. Suprasegmentalaspects
5. Transcriptionmethodsinperceptualanalysis
6. Phonologicalprocesses–
types,languagespecificissues,identificationandclassificationof errors
7. Distinctivefeatures–
types,languagespecificissues,identificationoferrorsandanalysis.
8. Acousticaspectsofproductionandperceptionofspeechsounds;useofspectrograms

Unit2 **(15hrs)**

1. Factors related to articulation and phonological disorders:
 - Structural
 - Cognitive –
 - Linguistic
 - Neurological
 - Psychosocial
 - Social
 - Metalin
 - guistic
2. Transcription methods in perceptual analysis
3. Phonological processes – types, language specific issues, identification and classification of errors.
4. Distinctive features – types, language specific issues, identification of errors and analysis.
5. Acoustic aspects of production and perception of speech sounds; use of spectrograms

Unit3 Oral anomalies/ablations **(20hrs)****Cleft lip and palate:**

1. Etiological factors
2. Developmental biology of the face and palate
3. Syndromes – Pierre–Robin’s, Treacher–Collin’s, Crouzon’s disease
4. The velopharyngeal mechanism muscles and functions
5. Types of cleft lip and palate
6. Classification systems
7. Team management composition, responsibilities, co-ordinator
8. Speech and language problems of individuals with cleft
9. Associated problems of individuals with cleft hearing, dental, psychosocial, physical.
10. Diagnostic procedures and instruments used in assessment of speech.
11. Treatment Concepts – Surgical repair of cleft lip, palate and velopharynx (outline)
12. Treatment procedures for speech.
13. Prosthetic speech appliances for patients with cleft palate.

Glossectomy

1. Effect of partial and total glossectomy on speech
2. Characteristics of glossectomy speech
3. Rehabilitation of speech
4. Prosthetic fitting, design, assessment
5. Effects on swallow
6. Rehabilitation of swallow

Unit4**(10hrs)**

Assessmentprocedures:Typesofassessment,samplingprocedures,scoringprocedures,criteria for selectionof instrumentsforassessment.

AssessmentofOralperipheralmechanism

Speechsounddiscrimination,stimulabilityandoralstereognosisAnalysis and interpretationof data:

IntelligibilityandseverityjudgmentsNormative data

Errorpatterns.

5.Characteristicsofdisorderedphonologyanddifferentialdiagnosis

Unit5**(10hrs)**

Intervention:Stagesoftreatmentandmeasuringimprovement,longtermgoals,shorttermgoalsand activities forachieving goalsincases withmisarticulation.

Issuesinmaintenanceandgeneralization.

Teamapproachandprofessionalcommunication(inter,intraprofessionalandclientoriented)

Approaches to treatment: motokinesthetic, traditional approaches integral stimulation,phonological,distinctivefeature,minimalcontrasttherapy,learningtheories,programmed,paired-stimuli.

Computerizedinterventionpackages,metaphontherapy

LISTOFOBOOKS

CompulsoryReading:

1. Bernthal,J.E.andBankson,N.W.(1988).ArticulationandPhonologicalDisorders.(3rdEd.). New Jersey: PrenticeHall Inc.

2. Weiss,C.E.,Lillywhite,H.S.andGordon,M.E.(1980).ClinicalManagementofArticulation Disorders.St.Louis:C.V.Mosby

3. Creaghead,N.A.,Newman,A.W.andSecord,W.A.(1989).Assessmentandremediationof articulatory and phonological disorders. (2nd Ed.). New York: Macmillan

Additional/OptionalReading:

4. Johnson,J.P.(1980).NatureandTreatmentofArticulationDisorders.Springfield:Charles C.Thomas.

BASLP303VOICEANDLARYNGECTOMY**(100+50marks)****(Total= 75hrs)**

Objectives:

Afterstudyingthispaperattheendoftheyear,thestudentsshouldbeabletounderstandthefollowing:

- · Characteristics of voiceanditsdisorders
- Laryngealabnormalities
- AssessmentandManagement

Unit1 (15hrs)
 Characteristics of normal voice: Physiological, acoustical and aerodynamic correlates Development: Birth to senescence; including age-related changes
 Theories of phonation Classification of abnormal voice
 Voice disorders in other conditions:
 Voice disorders related to respiratory problems
 Voice problems in conditions like Hearing impairment and deafblind Voice problems in Endocrine disorders

Unit2 (15hrs)
 Etiology, incidence, prevalence, signs and symptoms of:
 Organic voice disorders: Laryngeal cancer also to be included here
 Non-organic voice disorders: eg: Functional disorders (Psychosomatic-Functional aphonia and physiological- voice abuse)
 Congenital voice disorders
 Neurological voice disorders

Unit3 (15hrs)
 1. Evaluative procedures and Instrumentation for:
 Invasive procedures—endoscopic procedures
 Non-invasive (Acoustic, perceptual, aerodynamic, Electro Glotto Gram, Inverse filtering procedures)
 2. Comparison of normal and abnormal voice patterns based on the above procedures

Unit4 (15hrs)
 Laryngectomy:

- Types and characteristics of laryngeal surgery
- Assessment of laryngectomy and associated problems
- Management of laryngectomy:
 - a) Esophageal speech: anatomy, candidacy, different types of air intake procedures, speech characteristics of esophageal speech;
 - b) Tracheo-esophageal speech: anatomy, candidacy, different types of TEP, fitting of prosthesis, speech characteristics, complications in TEP;
 - c) Artificial larynx: different types, selection of artificial larynx, speech characteristics;
 - d) Pharyngeal speech, buccal speech, ASA I speech, gastric speech;
 - e) Pre and postoperative counseling

Unit5 (15hrs)
 1. Medical/Surgical procedures in the treatment of voice disorders
 2. Voice therapy—various techniques
 3. Professional voice users: Definition, types, characteristics, importance of vocal hygiene and professional voice care

LIST OF BOOKS

Compulsory Reading:

1. Boone,D.R.&McFarlane,S.C(1994):The Voice and Voice Therapy.(Fifth Ed.).EnglewoodCliffs,Prentice-Hall, Inc.New Jersy.
2. Prater,R.J.and Swift,R.W.(1984):Manual of Voice Therapy.Little,Brown and Co,Boston.
3. Andrews.M.L.(1995):Manual of Voice treatment,Singular publishing group, San Diego.
4. Doyle,PC(1994) Foundation of voice and speech rehabilitation following laryngeal cancer .Singular publishing group.San Diego.

Additional/Optional Reading:

5. Brown. W.M.s. and others(1996)(ed):Organic voicedisorders.Singular publishing group , Sandiego.
6. Joseph,CStempleLeble,EGlaze,BernickKGerdeman.Clinical voicepathology.Theory & Management (II Edition)
7. Aronson,A.E.(1990):Clinical Voice Disorders, New York: Thieme, Inc.
8. Greene,M.C.L.and Mathieson,L.(1989):The Voice and Its Disorders. Whurrpublic ations, London.
9. Case,J.L.(1991):Clinical Management of Voice Disorders, Pro-Ed, Austin.
10. Fawcus,M.(Ed.)(1991):Voice Disorders and Their Management. Singular Publishing Group. San Diego
11. Salmon,S.J.and Mount,K.H.(Eds.)(1991):Alaryngeal Speech Rehabilitation. Prof-Ed. Austin.
12. Keith,RL&Darley(III Edition)Laryngectomy rehabilitation. Pro.Ed. Austin

BASLP304:DIAGNOSTIC AUDIOLOGY

(100+50marks)

(Total=75hrs)

Objectives:

After studying this paper at the end of the year, the students should be able to understand the following –

- need for test battery approach
- indications for administering different audiological tests
- procedures for identifying an individual with pseudo hypacusis
- administration and interpretation of tests for APD

Unit1

(12Hours)

1. Introduction to Diagnostic Audiology:

- Need for test battery approach in auditory diagnosis & integration of results of audiological tests.
- Indications for administering audiological tests to identify Cochlear pathology, Retrocochlear pathology, functional hearing loss, Central-processing disorders.

2. Tests to differentiate between cochlear & retro-cochlear pathology Speech audiometry: Need for speech audiometry, Speech recognition threshold, speech identifications score, UCL, MCL, dynamic range, articulation index, Tests developed in India and abroad, Factors affecting speech audiometry, Limitations of speech audiometry, Masking for speech audiometry, PI-PB function. Speech discrimination tests with and without the presence of noise. Filtered speech tests and time compressed speech tests.

Social Adequacy Index

- ABLB, MLB
- SISI
- Test for adaptation
- Bekesy Audiometry
- Brief tone audiometry

Unit2

(18Hours)

3. Immittance Audiometry

- Introduction, Principle of Immittance audiometry, Instrumentation,
- Tympanometry – Tympanometric peak pressure, static immittance, gradient/tympanometric width.
- Reflexometry – Ipsilateral & contralateral acoustic reflexes, special tests
- Clinical application of Immittance evaluation

Unit3

(20Hours)

4. Auditory Brainstem Response

- Introduction & classification of AEPs, Instrumentation, Test procedure, factors affecting Auditory Brainstem Responses, Interpretation of results & clinical application,
- ECOG, early response
- Middle & Long latency auditory evoked potentials – test procedure, factors affecting
- MLR & LLR, Interpretation of results & clinical application.

Unit4**(10Hours)****5. OtoacousticEmissions**

Introduction,classificationofOAEs,Instrumentation,measurementofOAEprocedure,interpretationof results & clinical applications.

6. TeststodetectPseudohypoacusis

- Puretonetestsincludingtoneinnoisetest,Stengertest
- SpeechtestsincludingLombardtest,Stengertest,Lip-readingtest,Doefer-Stewarttest.
- Identificationoffunctionalhearingloss

7. Vestibulartesting**Unit5****(15Hours)****8. CentralAuditoryDisorders**

(a) Definition,terminologiesused,incidence&causes,indicationsforadministrationofCAD test,rationaleforCADtests.

(b) TeststodetectCentralAuditoryDisorders

- Monoaurallowredundancytests
- Filteredspeechtests
- Timecompressedspeechtests
- Speech-in-noisetest
- SSIwithICM
- Othermonoaurallowredundancytests

(c) Dichoticspeechtests

- Dichoticdigittest
- Staggeredspondaicwordtest
- DichoticCVtest
- SSIwithCCM

(d) Binauralinteractiontests

- RASP
- BinauralFusionTest(BST)
- MLD
- Otherbinauralinteractiontests

(e) Temporalorderingtasks

- Pitchpatterntest
- Durationpatterntests
- Othertemporalorderingtests

(f) VariablesinfluencingCentralAuditoryAssessment

- Proceduralvariables
- Subjectvariables

(g) Testfindingsinsubjectswithcentralauditorydisorders

- Brainstemlesion
- Cortical&hemisphericlesion
- Interhemisphericdysfunction

- CAPD in children
 - CAPD in elderly
- (h) Other special test—Minimal auditory capability test, SPIN, HINT, CST.

LIST OF BOOKS

Compulsory Reading:

1. Hodgson, H.R. (1980) Basic Audiologic Evaluation, London Williams and Wilkins.
2. Martin, F.N. (1991), Introduction to Audiology, IV Edition, New Jersey: Prentice Hall.
3. Martin, H. (1987), Speech Audiometry. Whurr Publisher, London
4. Newby, H.A. (1985), Audiology, New York: Appleton-Century-Crofts.
5. ISHAB Battery
6. Katz, Handbook of Clinical Audiology 4th/5th edn.
7. Rintelmann—
Contemporary issues in audiology Audiologists Des
I Ref. Vol. I, by James W. Hall.

Additional Reading:

1. Beagly, H.A. (Ed.) (1981). Audiology and Audiological Medicine. Vol. 1, Oxford University Press.
2. Bess and Humes (1990) Audiology—Fundamental. Williams and Wilkins, London.
3. Davis and Silverman, (Latest Edition). Hearing and deafness. Holt, Rinehart & Winston, London.
4. Rose, D.M. (Ed.) 1978), Audiological Assessment, New Jersey: Prentice Hill.
5. Relevant IS documents

BASLP305 CLINICAL PRACTICE IN SPEECH LANGUAGE PATHOLOGY **(50+50 marks)**

1. Carry out informal and formal assessment procedures for the following aspects of speech and language (from a normal child – 2 samples)
 - i)
 - Pre-linguistic skills
 - Non-verbal communication
 - Child directed speech
 - ii)
 - Semantics
 - Syntax and morphology
 - Pragmatics
 - iii)
 - Phonological process and its analysis
 - Speech intelligibility
 - Transcription of the sample in IPA should be done.
2. Familiarization of the tools used for evaluation and treatment of Childhood communication disorders, Articulation and Phonological Disorders, Maxillofacial anomalies:
 - Receptive Expressive Emergent Language Scale
 - Scale for Early Communication Skills in Hearing Impaired children

- 3-Dimensional Language Acquisition Test
 - Northwest Syntax Screening Test
 - Bankson's Language Screening Test
 - Test for Examining Expressive Morphology
 - Autism Behaviour Composite Checklist and Profile
 - Linguistic Profile Test
 - Tests for Learning Disability
 - Screening Test for Developmental Apraxia of Speech
 - Articulation assessment tests in different Indian languages
 - Voice Handicap Index and other perceptual scales.
 - Other Indian tests and materials available
3. Presentation of 5 cases of detailed assessment and therapy plans (1 each at least under each category), using information from relevant proforma, tests administered and treatment options
- 4.
- i) Perceptual analysis of 5 normal and 2 abnormal voiced disorders samples
 - ii) Measurement of the following parameters in 5 normal samples and 5 samples with voiced disorders:
 - Measurement of Fo, Amplitude, Diadochokinetic Rate, Maximum Phonation Duration, s/z ratio, Vital capacity and Mean Air Flow Rate
 - Exposure to Electroglotogram and Perturbation measurements using software
 - Measures of suprasegmental aspects

- 5.
- Transcription and analysis of phonological processes in children using IPA
- Familiarization with cerebral palsy assessment, reflex testing
6. Planning and executing a minimum of 5 cases (including child and adult) for approximately 5 sessions each and preparation of the following:
 - Carry out baseline evaluation
 - Preparation of pretherapy reports
 - Develop proficiency in using various therapy techniques for childhood communication disorders, voice disorders, articulation and phonological disorders
 - Provide guidelines for home-based intervention in the form of home training programs/modules for the above mentioned disorders
 - Making appropriate referrals and preparing sample referral letters to various professionals connected with the above mentioned disorders
 - Being aware of various centers available for rehabilitation (local, national, international)
7. Counselling parents of children with childhood communication disorders, voice disorders, articulation and phonological disorders; Compiling relevant counseling points pertaining to each of the above mentioned disorders
8. Maintaining audio samples used for practical analysis
9. Practice in writing sample diagnostic and therapy reports (for real/hypothetical cases)
10. Compiling the clinical work done into a clinical work record for submission

FOURTH SEMESTER
BASLP401 TECHNOLOGY & MANAGEMENT FOR PERSONS WITH HEARING IMPAIRMENT-II

(100+50marks)

(Total= 75hrs)

Objectives:

After studying this paper at the end of the year, the students should be able to understand the following –

- importance of early identification
- different methods and approaches to train children with hearing impairment
- educational options for children with hearing impairment
- classification of hearing aids
- setting up of classrooms for children with hearing impairment
- electroacoustic characteristics
- selection of hearing aids

Unit1

(15hrs)

- Definitions and goals of rehabilitation & aural rehabilitation
- Early identification and its important aural rehabilitation
- Unisensory Vs Multisensory approach
- Manual Vs oral form of communication for children with hearing impairment
- Total communication

Unit2	(15hrs)
<ul style="list-style-type: none"> · Methods of teaching language to the hearing impaired · Natural method · Structured method · Computer aided method 	
Unit3	(15hrs)
<ul style="list-style-type: none"> · Educational problems of children with hearing impairment in India · Educational placement of hearing impaired children · Criteria for recommending the various educational placements · Factors affecting their outcome · Counseling the parents and teachers regarding the education of the hearing handicapped · Parent Infant Training Programme (PIP) & Mother's Training Programme, Home training – need, preparation of lessons; correspondence programs (John Tracy Clinic, SKI-HI), follow up · Setting up classrooms for the hearing handicapped, Classroom acoustics · Preferential seating and adequate illumination 	
Unit4	(15hrs)
<p>A) Electroacoustic Characteristics & measurements for hearing aids</p> <p>a) Instrumentation & Analysis of Electroacoustic characteristics of all types of hearing aids.</p> <p>b) Measurement of standard & specification of hearing aids according to ISI, IEC and ANSI</p> <p>c) Interpretation of the analysis</p> <p>d) EAC of hearing aid along with earmould.</p> <p>B) Directional hearing aids, modular hearing aids</p> <p>Routing of signals, head shadow/baffle/diffraction effects Output limiting: Peak clipping, compression</p> <p>Extended low frequency amplification, frequency transposition, Bone anchored hearing aid, Master Hearing aids</p> <p>C) Signal processing in hearing aids B ILL, TILL, PILL</p> <p>Programmable and digital hearing aids Signal enhancing technology</p>	
Unit5	(15hrs)
<p>Hearing Aid selection</p> <p>a) Pre-selection factors: Ear to be fitted, monoaural vs. binaural hearing aids, type of receiver, style of hearing aid.</p> <p>b) Prescriptive & comparative procedure</p> <p>c) Functional gain & insertion gain methods: Instrumentation, prescription formulae, Articulation Index, Speech-spectrum (banana), merit & demerit of each.</p> <p>d) Hearing aids for conductive hearing loss, congenital malformation, chronic middle ear disorders</p> <p>e) Hearing aids for infants/children/multiply handicapped</p> <p>f) Hearing aids for adults & geriatrics: recruiting ears, poor word recognition scores (WRS)</p> <p>g) Hearing aids for the sightless</p> <p>h) Procuring hearing aids under various schemes of the Government of India/State</p>	

LIST OF BOOKS

Compulsory Reading:

1. Sanders,D.A.(1993).ManagementofHearingHandicap;InfantstoElderly,3rdEd.,New Jersey,PrenticeHall.
2. Tucker,I.,& Nolan,M.(1984).EducationalAudiology.London:CroomHelm,Chapter.10.

BASLP402 PAEDIATRIC AUDIOLOGY

(100+50marks)

(Total=75hrs)

Objectives:

After studying this paper at the end of the year, the students should be able to understand the following –

- development of auditory system and behaviour
- early identification procedures using subjective and objective measures
- diagnostic tests for the paediatric population

Unit1

(15hrs)

- a) Development of human auditory system
 - Basic embryology
 - Embryology of the auditory system
 - Relevance of the information with specific reference to syndromes
- b) Development of auditory behaviour
 - Prenatal hearing
 - Newborn hearing
 - Auditory development from 0-2 years

Unit2

(15hrs)

- a. Early identification of hearing loss – need with specific reference to conductive and sensorineural hearing loss.
- b. Screening for hearing loss using high risk registers
- c. Behavioural screening tests: Stimuli, procedures, recording of response, interpretation of results and validation of results
- d. Concept of universal hearing screening

Unit3

(15hrs)

- a. Objective screening tests: Immittance, Evoked potentials, OAE,
- b. School Screening – Objective: Screening for hearing sensitivity, screening for middle ear effusion. Need, criteria, instrumentation.
- c. Individual and group screening / Mass media screening tests Importance of follow-up.

Unit4**(15hrs)**

a) Hearing testing in neonates and infants:

Behavioural Observation Audiometry (BOA), Conditioning techniques including CORA, VRA and its modifications, TROCA, Play audiometry.

b) Speech Audiometry in children: Tests & material used to obtain:

- Speech Detection Threshold (SDT)
- Speech Recognition Threshold (SRT)
- Speech recognition tests including VASC, WIPI, NuChip, Glendonald Auditory Screening Procedure (GASP), Early Speech Perception Test (EST), Speech tests developed in India.

c) Factors affecting speech audiometry results in children, BC speech audiometry

Unit5**(15hrs)**

a) Functional hearing loss in children: Signs/symptoms, Tests

b) Central Auditory Processing Disorders in children: Signs/symptoms, Screening tests

c) Use of physiological tests in children

- Immittance audiometry in the pediatric population
- Auditory Brainstem Response in pediatric population
- OAE findings in the pediatric population.

LIST OF BOOKS

Compulsory Reading:

1. Northern, J.L. and Downs, M.P. (1991). Hearing in children. 3rd Ed. Baltimore: Williams and Wilkins.
2. Hayes & Northern (1996). Infants and Hearing
3. McCormick, B. (ed.) (1993) wned. Pediatric Audiology 0-5 yrs. Valerie Newton (ed) (2003). Pediat Audiological Medicine

Additional Readings:

1. Davis, J.H., and Hardick, E.J. (1981). Rehabilitative Audiology for children and adults, 2. New York: John Wiley and Sons.
3. Erber, N.P. (1982). Auditory Training, Washington: A.G. Bell Association for deaf.
4. Fulton, R.L. and Lloyd, L.L. (1975). Auditory assessment of the difficult to test, Baltimore: Williams and Wilkins, Co.
5. Gerber, S.E. (1982). Audiometry in infancy. New York: Grune and Stratton.
6. Gerber, S.E., and Mencher, S.T. (1978). Early diagnosis of hearing loss, New York, Grune and Stratton.
7. Ling, D. (1978). Speech and hearing impaired child. Washington: Alexander Graham Bell Association for the deaf.
9. Martin, F.N. (1978). Paediatric Audiology, New Jersey: Prentice Hall.
10. Sanders, D.A. (1993). Management of hearing handicap: Infant to elderly. 3rd Ed. New Jersey: Prentice Hall.

BASLP403 Basic Statistics and Scientific Enquiry in Audiology and Speech Language Pathology

(100+50marks)

(Total=75hrs)

Objectives:

After studying this paper at the end of the year, the student should be able to understand the following

- The basics of statistics and its relevance to the field of speech and hearing
- Carry out calculations of data related to basic statistical operations
- Interpret statistical results at basic level and make inferences
- Need for scientific enquiry
- Documentation of research

Part A: Basic Statistics

(38Hrs)

Unit 1

(6Hrs)

Introduction to statistics: Its importance in behavioural sciences; descriptive statistics and inferential statistics; usefulness of quantification in behavioural sciences; application to speech and hearing

Unit 2

(9Hrs)

- Measures: scales of measurement; nominal, ordinal, interval and ratio scales
- Data collection: classification of data - class intervals, continuous and discrete measurement, drawing frequency curve, drawing inference from graph

Unit 3

(5Hrs)

- Measurement of central tendency: Need, types - mean, median, mode; working out these measures with illustrations
- Measures of variability: Need, types of range, deviation - average deviation, standard deviation, variance; interpretation

Unit 4

(8Hrs)

- Normal distribution: general properties of normal distribution; theory of probability; illustration of normal distribution; area under normal probability curve
- Variants from the normal distribution: skewness, kurtosis; their quantitative measurement; Introduction to non-parametric statistics

Unit 5

(10Hrs)

Correlation: Historical contribution; meaning of correlation; types of correlation product moment correlation, content correlation, rank correlation etc
 Standard error sampling distribution; Type I and Type II errors, Y₂, 't' and 'F' - tests; Methods of significance of differences between means and their interpretation and probability levels - small samples, large samples.

BASLP404:ResearchMethodsinAudiologyandSpeechLanguagePathology (37Hrs)

Unit1 (10Hrs)

- Scientific status of speech language pathology and audiology; speech languagepathology and audiology as a behavioural science; need for scientific enquiry inspeech language pathology and audiology; choosing a research problem, formulationofresearchquestion,statementofresearchquestion,formulationofhypothesis ,typesofhypotheses

Unit2 (9Hrs)

- Parameters for scientific research in speech language pathology and audiology:Identification of variables and the types; types of data and its nature; measurementproceduresinspeechlanguagepathologyandaudiology;instrumentalandbehaviouralmeasuresand recording procedures

Unit3 (6Hrs)

- Samplingmethods:types,methodsofdatacollection
- Applicationoftheabovewithhypotheticalillustrations

Unit4 (6Hrs)

- Introductiontoresearchmethodsanddesigns:Expost-facto,experimental,standardgroupcomparisons,evaluation researchetc.
- Applicationofthesetoclinicalpopulationandcommunityresearch

Unit5 (6Hrs)

- Documentationofresearch:Reportingresearch-organization,analysisandpresentationof data
- Componentsofresearcharticle,reportwritingstyle
- Ethicsofresearchinbehaviouralsciences
- Qualitiesofaresearcher/scientificclinician

LISTOFBOOKS

CompulsoryReading:

1. Hegde,M.N.ClinicalResearchinCommunicativeDisorders-PrinciplesandStrategies.(1994)(2nd Edition).Pro-ed.
2. Pannbacker,M.H.andMiddleton,G.F.(1994).IntroductiontoClinicalResearchinCommunicationDisorders.SanDiego: SingularPublishing.
3. Maxwell, D.L. and Satake, E. (1997). Research and Statistical Methods inCommunication Disorders.Baltimore: WilliamsandWilkins

Additional/OptionalReading:

1. Stein,F.andCutler,S.K.(1996).ClinicalResearchinAlliedHealthandSpecialEducation.San Diego:Singular Publishing GroupInc.
2. Portney,L.G.andWalkins,M.P.(1993).FoundationsofClinicalResearch.Conn ectient:AppletonandLange.
3. Woods,A.,Fletcher,P.andHughes,A.(1986).StatisticsinLanguageStudies.Cambridge:University Press.

BASLPCLINICALPRACTIUMAUDIOLOGY

(50+50marks)

SectionA:DiagnosticAudiology

1. Familiarization of instrumentation for speech audiometry, immittance audiometry, soundfield -testing.
2. Complete pure tone audiometry (with AC/BC, unmasked/masked), interpretation of audiograms, identifying indicators for special/further diagnostic testing, writing casereview(25 cases)
3. Speech Audiometry:familiarizing with speech test material in at least 2 Indian languages, mastering live voice presentation/recording presentation, administering SAT, SRT, WRS, MCL, UCL, PI/PB function test.
4. Collection of Speech Audiometry test materials in Indian languages.

5. Speech Audiometry on 10 normal subjects, and 20 cases with conductive hearing loss, sensorineural hearing loss and functional hearing loss. Interpretation of speech audiometry results.
6. Holistic audiological assessment for differential diagnosis (Cochlear & Retrocochlear): o Routine pure tone & speech audiometry
 - o Administering special tests using pure tone: Tone Decay Test, STAT, SISI, ABLB, MLB, SPAR, Test for functional hearing loss.
7. Immittance Audiometry (minimum of 5 cases) – PVT, Tympanometry, Acoustic Reflex testing (ipsi & contra). Interpretation of the findings taking into consideration the ENT reports.
8. Auditory Brainstem Response (ABR) & Oto-Acoustic Emissions (OAE) –
 - o Preparation of the patient
 - o Informing the patient/caregiver with respect to the procedure
 - o Electrode montage
 - o Conduct the procedure with respect to test protocol (5 cases each)
 - o BC-ABR, Toneburst ABR

Section B: Rehabilitative Audiology

1. Speech and language characteristics of the deaf
2. Management of post-lingual hearing impaired.
3. Role-play activities for teaching language to the hearing impaired.
4. Prepares schedules for educational placement of 5 hearing impaired children having different hearing capacities.
5. Counselling parents regarding educational placement of the hearing impaired.

Sect ion C: Paediatric Audiology

1. Informal screening – purpose, materials used, noisemakers, their spectral characteristics, procedure (5 normal & 5 hearing impaired children)
2. Soundfield testing: BOA, VRA, Play audiometry (5 cases each)
3. Observe auditory responses based on video clippings or live case testing.
4. Testing multiply handicapped children.

FIFTH SEMESTER
BASLP501: FLUENCY AND ITS DISORDERS

(100+50marks)

(Total=75hrs)

Objectives:

After studying this paper at the end of the year, the student should be able to understand the following

- Characteristics and types of Fluency disorders, specify-
Stuttering and Cluttering; Types of Stuttering viz developmental, Neurogenic and Psychogenic
- Theories of stuttering
- Assessment and Management

Unit1

(15Hrs)

- Fluency: Definition, development of fluency, factors influencing the development
- Definitions of intonation, stress and rhythm - Development of intonation, rhythm, stress – their implications to therapy
- Measures of fluency and other prosodic aspects

Unit2

(15Hrs)

Stuttering: definition, nature, Loci Of stuttering viz Adaptation and consistency effect
 · Facts - incidence and prevalence, onset, Heredity, speech language development in individuals with stuttering, role of imitation, socio-economic status and cultural factors
 Factors which reduce stuttering and factors which increase it. Normal non fluency; primary stuttering; secondary stuttering. Development of stuttering - Van Riper's Tracks and Peter's sand Guitar's 5 developmental levels Cluttering and neurogenic stuttering

Unit3

(15Hrs)

- Theories of stuttering: organic vs. functional; cerebral dominance; diagnostogenetic and learning theories; demand-capacity model

Unit4

(15Hrs)

- Assessment of stuttering;
- Associated problems
- Differential diagnosis of developmental stuttering, neurogenic stuttering, cluttering, normal non fluency, spasmodic dysphonia

Unit5

(15Hrs)

- Prevention
- Therapy; rationale; prolongation; shadowing; habit rehearsal technique, DAF, masking shock therapy, desensitization, timeout, airflow and modified airflow technique; Group therapy
- Sequence of therapy procedures VIZ-
- MIDVA Sand Perkin's Approach
- Transfer and maintenance
- Measurement of progress; naturalness rating
- Relapse and recovery

LIST OF BOOKS

Compulsory Reading:

1. Curlee and Perkins (Ed.). (1985): Nature and treatment of stuttering. Taylor and Francis, London.
2. Silverman, F.H. (1992). Stuttering and other fluency disorders. Prentice Hall, Inglewood Cliffs.
3. Peter and Guitar (1991). Stuttering - An integrated approach to its nature and treatment Additional/Optional Reading:

1. Bloodstein, O. (1993): Stuttering. Allyn and Bacon, Boston.

2. Fawcus, M. (1995): Stuttering. Whurr Publishers, London.

3. Mark Onslow (1996) Behavioural management of stuttering. Singular Publishing Group Inc.

BASLP502: NEUROGENIC LANGUAGE DISORDERS IN ADULTS

(100+50marks)

(Total=75hrs)

Objectives:

After studying this paper at the end of the semester, the students should be able to understand the following –

- Brain and language relationship
- Aphasias and non-aphasia conditions
- Assessment and management

Unit 1

(15Hrs)

Neural bases of language: Neuroanatomical, neurophysiological and functional language function

- Pathophysiology of neurological lesions affecting speech, language and hearing; concepts of recovery, reorganization and relearning
- Theoretical considerations in neurogenic language disorders: Competence Vs Performance; loss Vs Interference, Regression hypothesis, multilingualism, Unidimensional Vs multidimensional breakdown

Unit 2

(15Hrs)

- Definitions of Aphasia
- Etiology
- Classification of aphasia based on anatomical, linguistic and psycholinguistic aspects
- Clinical features: Linguistic, psycho-social, neuro-behavioural
- Associated problems in aphasia: their definition, classification and clinical features

Unit 3

(15Hrs)

- General and specific neurological examination procedures (higher functions, cranial nerves, motor and sensory systems, reflexes and fundus)
- Neurological investigations: Electrophysiological (Electro Encephalo Gram, Evoked potentials) and imaging (Computerized Tomography, Magnetic Resonance Imaging)
- Assessment of speech, language and cognitive behaviour of adults with language-based disorder: Informal and formal test procedures (Western Aphasia Battery,

Boston Diagnostic Aphasia Examination, Boston Naming Test, Minnesota Test for Differential Diagnosis of Aphasia, Porch Index of Communicative Abilities, Functional Communication Profile, Token Test, Revised Token Test, Bilingual Aphasia Test and others; Indian tests

- Unit4** **(15Hrs)**
- Other language disorders in adults: Introduction, Etiology, clinical profile, assessment and management
 - Traumatic Brain Injury
 - Right Hemisphere Damage Disorder
 - Primary Progressive Aphasia
 - Language disorders in Dementia
 - Differential diagnosis of Adult Neurogenic disorders

- Unit5** **(15Hrs)**
- Intervention: Prognostic indicators, Spontaneous recovery; General principles of therapy; specific techniques (Melodic Intonation therapy, Visual Action therapy, Schuell's Auditory stimulation, Thematic language stimulation, developing functional communication and others.
 - Team approach; Group therapy; Family support-preparing family, friends and colleagues on what to expect and how to deal with aphasic as a person; Counseling regarding role of family; Individual counselling and spouse and family counseling AAC

LIST OF BOOKS

Compulsory Reading:

1. Understanding Aphasia. (1993). Goodglass, H. Academic Press Inc.
2. Davis, G.A. (1993). A Survey of Adult Aphasia and Related Language Disorders. Prentice Hall Inc.
3. Chapey, R. (1994). (Ed). Language Intervention Strategies in Adult Aphasia. Williams and Wilkins Publication

Additional/Optional Reading:

1. Speech and Language Evaluation in Neurology: Adult Disorders. (1985). Ed. Darby, J.K. Grune and Stratton Inc.
2. Acquired Speech and Language Disorders. (1994). Murdoch, B.E. London: Chapman and Hall.
3. Aphasia and Related Language Disorders. (1990). LaPointe, L.L. Theime Medical Publishers.

BASLP503:MOTORSPEECHDISORDERS**(100+50marks)****(Total=75hrs)****Objectives:**

After studying this paper at the end of the year, the students should be able to understand the following:

- Characteristics of motor speech disorders in children and adults
- Types of dysarthria, Apraxia (Developmental apraxia of speech) and other conditions in children and adults
- Assessment and Management

Part A: Childhood Motor Speech Disorders (38 Hrs)

Unit1**(8hrs)**

- Introduction to neuromotor organization and sensorimotor control of speech
 - o Motor areas in cerebral cortex, motor control by subcortical structures, brainstem, cerebellum and spinal cord.
 - o Central nervous system and peripheral nervous system in speech motor control.
 - o Centrifugal pathways and motor control
 - o Neuromuscular organization and control
 - o Sensorimotor integration
 - o Introduction to motor speech disorders in children - Dysarthria and Developmental apraxia of speech.

Unit2**(15Hrs)**

- Cerebral palsy (11 hrs)
 - o Definition, causes and classification
 - o Different types of Cerebral palsy: Can they be movement disorders
 - o Disorders of muscle tone: Spasticity, rigidity, flaccidity, atonia
 - o Disorders of movement: Hyperkinesias and dyskinesias - Ballismus, tremor, tic disorder, myoclonus, athetosis, chorea, dystonia, hypokinesias
 - o Disorders of coordination - Ataxia
 - o Neuromuscular development in normals and children with cerebral palsy
 - o Reflex profile
 - o Associated problems
 - o Speech and language problems of children with cerebral palsy
 - Syndromes with motor speech disorders (4 hrs)
 - o Juvenile progressive bulbar palsy
 - o Congenital supranuclear palsy
 - o Guillain-Barre syndrome
 - o Duchenne muscular dystrophy

Unit3 **(6hrs)**

- o Assessment of speech in cerebral palsy - objective and subjective methods
- o Differential diagnosis of cerebral palsy
- o Management: Introduction to different approaches to neuromuscular education (Bobath, Phelps and the others); Speech rehabilitation in cerebral palsy- Verbal approaches: vegetative exercises, oral sensorimotor facilitation techniques, compensatory techniques- correction of respiratory, phonatory, resonatory and articulatory errors;
- o Team approach to rehabilitation; Neurosurgical techniques for children with cerebral palsy

Unit4 **(5hrs)**

Apraxia of speech in children or developmental apraxia of speech

- o Definition
- o Description: verbal and non-verbal apraxia
- o Differential diagnosis- dysarthria and other developmental disorders
- o Management of developmental apraxia of speech- Facilitation techniques for oral motor movements, speech therapy techniques, generalization of speech

Unit5 **(4hrs)**

Definition - alternative and augmentative communication (AAC). Application of alternative and augmentative communication methods in developmental dysarthrias and developmental apraxia of speech- Symbol selection, techniques for communication, assessment for AAC candidacy, choosing an appropriate system and technique, training communication patterns, effective use of AAC

PartB: Adult Motor Speech Disorders **(37Hrs)**

DYSARTHRIA AND APRAXIA

Unit1 **(12hrs)**

- (a) Definition and classification of dysarthria in adults.
- (b) Types of dysarthria in adults.
- (c) Neurogenic disorders learning to dysarthria in adults.
 - Vascular disorders- dysarthria following strokes, CVA, cranial nerve palsies and peripheral nerve palsies.
 - Infection condition of the nervous system- eg. Meningitis, polyneuritis and neurosyphilis.
 - Traumatic conditions- traumatic brain injury and dysarthria
 - Toxic conditions- dysarthria due to exogenous and endogenous causes.
 - Degenerative and demyelinating conditions- multiple sclerosis, Parkinson's disease, motor neurone diseases, Amyotrophic lateral sclerosis.
 - Genetic conditions- Huntington's chorea, Guillain-Barre syndrome.
 - Others leading to dysarthria- Anoxic conditions, metabolic conditions, idiopathic conditions and neoplasm.

Unit2	(7hrs)
d) Assessment of dysarthria I Instrumental analysis	
· Physiological and Electrophysiological methods	
· Acoustics	
· Advantages and disadvantages of instrumental analysis of speech in dysarthria. Perceptual analysis – measures, standard tests and methods, speech intelligibility assessments scales, advantages and disadvantages of perceptual analysis of speech in dysarthria.	
e) Differential diagnosis of dysarthria from functional articulation disorders, apraxia of speech, aphasia and allied disorders.	
Unit3	(6Hrs)
f) Management of dysarthria - Medical, surgical and prosthetic approaches- Speech therapy	
· Vegetative exercises	
· Oral sensorimotor facilitation techniques	
· Compensatory approaches – correction of respiratory, phonatory, articulatory and prosodic errors.	
· Strategies to improve intelligibility of speech.	
Unit4	(7Hrs)
g) Apraxia of speech in adults	
· Definition of verbal and nonverbal apraxia of speech	
· Different types, characteristics and classification	
· Assessment of apraxia of speech – standard tests and scales, subjective methods and protocols	
· Management of apraxia of speech – different approaches	
· Improving intelligibility of speech.	
.	
Unit5	(5hrs)
Dysphagia:	
· Definition	
· Phases of normal swallow	
· Etiology of swallowing disorders	
· Assessment and Intervention	
· Mechanical dysphagia related to glossectomy	
LIST OF BOOKS	
Compulsory Reading:	
1. Clinical Management of Motor Speech Disorders in Children. (1999). Caruso, F.J. and Strand, E.A. New York: Thieme.	
2. Motor Speech Disorders - A Treatment Guide. (1991). Dworkin, P.J. St. Louis: Mosby Year Book, Inc.	
3. Motor Speech Disorders: Substrates, Differential Diagnosis and Management. (1995).	

Duffy,J.R.St.Louis:Mosby.

4. Prefeedingskills.Morris.S.andKlein.M.U.K.:Winslow

Additional/OptionalReading

1. WorkingwithSwallowingDisorders.Langley.J.U.K.:Winslow
2. AcquiredSpeechandLanguagedisorders-A NeuroanatomicalandFunctionalNeurologicalApproach.(1994). Murdoch,B.E.London:ChapmanandHall.
3. NeurologyforSpeech-LanguagePathology.(1986).(2nded.)Love,R.J.andWebb, W.G.Butterworth.

BASLP504 CLINICALPRACTICUMINSPEECHLANGUAGEPATHOLOGY (50+50marks)

1. Understandaspects of informal and formal assessment for
 - i) Fluencydisorders
 - ii) Neurogeniclanguagedisorders
 - iii) Motorspeechdisorders
2. IdentifytheDifferentialDiagnosticcategoriesofthesedisorders
3. Familiarizationontheuseofvarious testsandmaterialsavailableforassessment
 - i) WesternAphasiaBattery
 - ii) IllinoisTestofPsycholinguisticabilities
 - iii) BostonDiagnosticAphasiaExamination
 - iv) RevisedTokenTest
 - v) RightHemisphereLanguageBattery
 - vi) ApraxiaBatteryforAdults
 - vii) FrenchayDysarthriaAssessment
 - viii) StutteringSeverityInstrument
 - ix) StutteringPredictionInstrument
 - x) Indiantestsandmaterialavailable
4. Carryoutassessmentonatleast1 caseeachfromtheabovementioneddisorderswithin assessmentreport andappropriatereferralletters.
5. Carry outtherapeuticplanonaclientwiththeabovementioneddisordersandsubmitareport of thesame.

6.

- Conduct a fluency analysis in 4 normal samples (2 child sample and 2 adult sample) for the percentage of total disfluency and the individual disfluency on a conversation, narration and reading task
- Measurement of rate of speech (words per minute, syllables per second) in normal samples
- Familiarization to different intonation, stress and rhythm patterns in speech samples (of different languages)
- IPA transcription of dysfluent speech; calculating the severity using any of the formal tests
- Comparing suprasegmental aspects of fluent and dysfluent speech samples
- Comparing normal non-fluency speech sample and child stuttering sample along with SSI scores

7. Counselling parameters for the following groups of disorders:

- Neurogenic language disorder (adult/geriatric; type)
- Motor speech disorder (based on age and site of lesion)
- Fluency disorders (age, motivation)
- Being cognizant about the legislative support available and direct the same to the parents / caretakers

9. Preparing public education pamphlets, hand-outs on different disabilities

SIXTH SEMESTER **BASLP601 REHABILITATIVE AUDIOLOGY**

(100+50marks)

(Total=75hrs)

Objectives:

After studying this paper at the end of the year, the student should be able to understand the following –

- speechreading
- auditory learning
- management of individuals with additional problems
- assistive listening devices
- implantable devices

Unit1

(15hrs)

1. Speechreading

(a) Definitions

(b) Need

(c) Visibility of speech sounds – audiovisual perception vs. visual perception

(d) Visual perception of speech by the hard of hearing

(e) Tests for speechreading ability, including Indian Tests

(f) Speechreading activities

2. Factors influencing speechreading

(a) Methods of training: analytical vs. synthetic; (including speech tracking)

(b) Individual and group training

Unit2

(25hrs)

Auditory training

(a) Definition and historical background

(b) Role of audition in speech and language development in normal children and its application in education of the hearing impaired.

- (c) Factors in auditory training: motivation of the case, intelligence, age, knowledge of progress, etc.
- (d) Auditory Verbal Therapy
- (e) Methods of auditory training
- (f) Auditory training activities
- (g) Communicative strategies
- (h) Individual vs. group auditory training

Unit3 **(15hrs)**

1. Speech Characteristics of persons with hearing impairment.
2. Management of hearing impaired individuals with special needs
 - (a) Management of multi-handicapped hearing impaired children (MHHI)
 - (b) Management of children with central auditory processing problems
 - (c) Rehabilitation of hearing impaired – elderly population

Unit4 **(05hrs)**

Assistive Listening Devices (ALDs)

- Classification based in auditory, visual & tactile stimulation
- Classification based on alerting devices Vs devices for speech perception.
- Selection of ALDs.

Unit5 **(15hrs)**

1. Implantable Devices

- Middle Ear Implants and BAHA (Bone Anchored Hearing Aid)

- Cochlear Implants

- Brainstem Implants

Components, Candidacy, Advantages and Complications for the same.

2. Utility of technology/devices in the management of tinnitus, hyperacusis.

LIST OF BOOKS

Compulsory Reading:

1. Clark, G.M., Cowan, R.S.C. & Dowell, R.C. (1997). *Cochlear Implantation for Infants & Children: Advances*. Singular Publishing Group Inc.
2. Davis J.M. & Hardick E.J. (1981). *Rehabilitative Audiology for Children and Adults*. New York : John Wiley & Sons
3. Erber N.P. (1982) *Auditory Training*. Washington DC: AG Bell Association for the Deaf
4. Schow, R.L.; & Nerbonne, M.A. (Eds) (1996). *Introduction to Audiologic Rehabilitation* (3rd edition). Boston: Allyn & Bacon
5. Maxon, A.B. & Brackett D. (1992). *The Hearing Impaired Child: Infancy through high School years*
6. Alpiner & Mc. Carthy
7. Aural Rehabilitation (2nd ed.) Raymond Hill (1982).
8. Visual communication for the HOH. History, Research, methods O'Neill & Oyer (1981).
9. Speech reading (lipreading) Jeffers & Barley (1971)
10. Speechreading – away to improve understanding (2nd ed.) Kaplan, Bally & Garretson (1985).
11. Deafness and communication – Sims, Walter, Whitehead.
12. Thirumalaia and Gayathri. *Speech of the Hearing Impaired*.
13. Bench.

BASLP602 NOISE MEASUREMENT AND HEARING CONSERVATION
(100+50marks) (Total= 75hrs)

Objectives:

After studying this paper at the end of the year, the students should be able to understand the following

- · effects of noise
- measurement of noise and vibration
- audiological findings in noise induced hearing loss
- legislations related to noise

Unit1 (15hrs)

a) Noise in the environment and effects of noise:

- Definition of noise
- Sources – community, industrial, music, traffic and others
- Types – steady & non-steady, Impulsive/Impact, intermittent
- b) Auditory effects of noise exposure
- Historical aspects
- TTS and recovery patterns
- PTS
- Histopathological changes (Metabolic, Mechanical, Biochemical, Vascular)
- Effect of noise on communication, Speech Interference Level (SIL), Articulation Index (AI)
- Perceived Noise in dB (PNdB), Perceived Noise Level (PNL), Effective
- Perceived Noise Level (EPNL), Noise Criteria (NC) curves, Noise Reduction Rating (NRR), Signal to Noise Ratio (SNR)

c) Non-auditory effects of noise exposure

- Physiological/Somatic & psychological responses, stress and health, sleep, audioanalgesia effects on CNS and other senses
- Effects of noise on work efficiency and performance

Unit2 (15hrs)

Audiometry in NIHL, Pure tone audiometry:

- Baseline and periodic monitoring tests, high frequency audiometry, brief tone audiometry, correction for presbyacusis
- Instrumentation: Manual audiometer, automatic audiometer
- Testing environment
- High frequency audiometry, Speech audiometry:
- Other audiological evaluations:
- Impedance audiometry
- ERA
- OAE
- Tests for susceptibility

Unit3 (15hrs)

Noise & vibration measurement

- Instrumentation and procedure for indoor and outdoor measurement of ambient noise, traffic noise, aircraft noise, community noise and industrial noise.
- Calibration: Biological and instrumental for AC & BC transducers.

Unit4**(15hrs)**

Hearingconservation:

Needforhearingconservationprogram,stepsinhearingconservationprogram.

Ear protective devices: (EPDs) Types: Ear plugs, ear muffs, helmets, special hearingprotectors,meritsanddemeritsofeach.PropertiesofEPDs:Attenuation,comfort,durability,

stability,temperature,tolerance.EvaluationofattenuationcharacteristicsofEPDs.Toughening.

Unit5**(15hrs)**

Lawsrelatedtonoise:

- Damage Risk Criteria (DRC) – definition, historical aspects, use of TTS and PTS,informationinestablishing DRC,-CommitteeonHearingBioacoustics&Biomechanics (CHABA), Air Force Regulation (AFR 160-3), American Academy ofOphthalmology&Otolaryngology(AAOO),ASA-Z24.5,Damageriskcontours,Walsh – HealeyAct,OccupationalSafety&HealthAct(OSHA),EnvironmentalProtectionAgen cy(EPA), Indiannoise standards. CorrectionforaginginNIHL.
- Claimsforhearingloss:Fletcherpointeighthformula,AMAmethod,AAOOformula,Califor nia variation in laws, factors in claim evaluation, variations in laws andregulations,date ofinjury,evaluationofhearingloss,numberoftests.
- Indianstudies/acts/regulations,Americanacts.

LISTOFBOOKS

1. BrueL, and Kjaer,(1982), Noise Control-Principles and practices.
2. Harris,C.M.(Ed.2),HandbookofNoiseControl New York:McGraw-Hill.
3. Kryter,K.D.(1970).TheeffectsofnoiseonMan. New York: Academic Press.
4. Tempest,N(1985).TheNoiseHandbook. London: AssessmentPress.
5. Sataloff,R.T.(1987).Occupationalhearingloss. Marcel Dekker, Inc.
6. Trivedi,P.R.and Gurudeep Raj(1992).NoisePollution, 1st Ed. New Delhi: AkashdeepPublis hingHouse.
7. BISSpecifications-List attached
-ISSpecifications-NoiseMeasurements.
-IS:7194-
1973 Specification for assessment of noise exposure during work for hearing conservation purposes
-IS:9167-1979 Specification for ear protectors.
-IS:6229-1980 Method for measurement of real-ear protection of hearing protectors and physical attenuation of earmuffs.
-IS:9876-1981 Guide to the measurement of airborne acoustical noise and evaluation of its effect on man.
-IS:7970-1981 Specification for sound level meters.
-IS:9989-1981 Assessment of noise with respect to community response.
-IS:10399-1982 Methods for measurement of noise emitted by stationary road vehicles.

BASP603CommunityOrientedProfessionalPracticesinSpeechLanguage PathologyandAudiology
(100+50marks) **(Total= 75hrs)**

Objectives:

After studying this paper at the end of the year, the students should be able to understand the following

-
- Epidemiology of speech, language and hearing disorders
- Service delivery and CBR issues
- Legislative support for rehabilitation
- Documentation and ethical issues

Unit1

(15hrs)

- Epidemiology of speech, language and hearing disorders
- Environmental, Social, Economic implications and preventive education
- Levels of prevention: Primary, Secondary, Tertiary
- Survey, prevalence, Incidence and its implication in planning
- Health promotion, specific protection, early diagnosis and treatment of a high-risk infant, Disability limitation, Educational and Vocational rehabilitation

Unit2

(15hrs)

- Approaches to service delivery: Institution based, Camp based, Community based and Role of NGOs
- Review of services in India
- Integration of Disabled into the community and ICF 2001

Unit3

(15hrs)

- Duties and responsibilities of SLP in various settings
- Professional ethics for SLPs, Code of Ethics, Right to Education Act, Industrial Employment Act
- Interacting with allied professionals and community health workers

Unit4

(15hrs)

- Planning services for the communication disordered population: Philosophy, planning, establishment of services for communication disorders - infrastructure, budget, staffing, equipment, furniture, policy making, record keeping, proposal writing.
- Strategies for awareness, public education and information (Camps, Print and audiovisual media, Surveys, Radio broadcasts, street plays).
- Empowering parents, persons with disabilities and the community; Skill transfer to DHL S, parents; grass-root level workers, teachers and health workers

Unit5**(15hrs)**

· Legislative support for rehabilitation- Rehabilitation Council of India Act (1992), Persons With Disability Act (1995), National Trust Act for the Welfare of Autism, CP, MR and Multiple Disabilities (1999), Environmental Act, Consumer Protection Act, Right To Information Act, UNCRPD Act.

· The professional as a witness; documentation; handling legal issues

LIST OF BOOKS

Compulsory Reading:

1. Baquer, A. & Sharma, A. (1997). *Disability: Challenges Vs Responses*. CAN publications.
2. Kundu, C.L., *Status of Disability in India*, (2000 & 2003) Ed. Kundu, C.L., RCI
3. Narsimhan, M.C. & Mukherjee, A.K. (1986). *Disability a Continued Challenge*: Delhi willey eastern.
4. WHO (2001). *International classification of Functioning, Disability and Health*. Geneva: WHO

5. Professional Issues in Speech-Language Pathology and Audiology - A Textbook. (1994). Lubinski R. and Frattali C. California: Singular Publishing Group

Additional/Optional Reading:

1. Administration and Management of Programs for Young Children. (1995) Shremaker, C.J. New Jersey : Prentice Hall Inc.
2. Management of Child Development Centres. (1993) Hildebrand, V. (3rd Ed.). Mac Millan Publishing Company.

BASLP604 CLINICAL PRACTIUM AUDILOGY**(50+50marks)****Section A: Hearing Aid Trial Postings**

1. Hearing aid trial: pre-selection of hearing aids, styles, EAC, other issues, inspection of ear moulds. Functional gain method (10 children & 10 adults). Concept of speech banana, aided audiogram.

2. Observing Real Ear Insertion Gain measurement (10 cases)

3. Pre-selection based on audiological evaluations (10 cases)

4. Hearing Aid trials:

· Functional gain, REIG, other methods with monoaural fitting, binaural fitting, Programmable hearing aid – Analog/Digital

· Explaining the benefits of hearing aid to the patient/caregiver

5. Counselling patients/caregivers regarding hearing aids – Care, maintenance, adjustments, tips to caregivers regarding acceptance of hearing aids (5 children & 5 adults), preparation of harness, cleaning of ear moulds. Binaural amplification and its uses.

6. Electro-

acoustic evaluation of hearing aids (body level & ear level), with and without ear moulds. Equipment for analysis. Calibration of hearing aid analyzer.

7. Models and makes available in the market, their EAC, cost of hearing aids, its suitability to various audiogram configurations, age etc.

8. Specificationsheets—BIS,ANSI,IECwithrespecttohearingaids.
9. AdministrationofSelf(Help)assessmentscales.
10. Fittingofhearingaidsforslopinghearingloss.
